GitHub: github.com/NamitBhutani | LinkedIn: linkedin.com/in/namitbhutani
Location: Hyderabad, India

EDUCATION

Birla Institute of Technology and Science (BITS), Pilani – Hyderabad Campus *08/2022 – 05/2027*
M.Sc. (Hons.) Economics, B.E. (Hons.) Computer Science **CGPA: 8.92 / 10.0**
Navyug Convent School (CBSE) *2021*
Class XII **86.6%**

TECHNICAL SKILLS

Languages: C++, Python, Java, JavaScript, TypeScript, GLSL
Frameworks & Tools: React.js, Next.js, Node.js, Flask, Express.js, PostgreSQL, Redis, Docker, Git, Nix, CI/CD, Unit Testing
Systems & Specialized: OpenGL, Computer Graphics, 3D Rendering, WebRTC, Microservices

EXPERIENCE

Google Summer of Code Contributor — Blender Foundation *06/2025 – 09/2025*

- Optimized Blender's sculpting system performance for high-resolution meshes with **1M+ vertices**
- Implemented spatial mesh reordering algorithm improving cache coherency and **rendering speed by 35%**
- Developed zstd-based undo data compression system, reducing **memory overhead by 80%**
- Collaborated with 10+ core developers on benchmarking and automated testing using **Python**

Software Engineering Intern — Vidcentum Technologies Pvt Ltd *05/2024 – 07/2024*

- Developed **asynchronous information retrieval API** for machine learning applications
- Achieved **<100ms query response times** using **Meilisearch** for **50,000+ document corpus**
- Built scalable **microservices architecture** with async HTTP integration and comprehensive error handling
- Implemented JSON processing pipeline handling **1000+ concurrent requests**

PROJECTS

procLand – 3D Terrain Generation System *02/2025 – Present*

- Engineered **GPU-accelerated** terrain generation system rendering **100K+ polygon meshes at 60+ FPS**
- Implemented **marching cubes** algorithm with optimized SSBO layout using **OpenGL and C++**
- Built interactive **3D visualization** with Phong lighting model, wireframe rendering, and camera controls

LegalTree – AI-Powered Legal Text Processing System *08/2024 – 11/2024*

- Deployed **containerized Graphene NLP system** for legal document relation extraction with **85% accuracy**
- Integrated **vector database pipeline** for contextual retrieval across **10,000+ Indian legal documents**
- Architected **full-stack system** with **React** frontend supporting real-time document processing

Chronofactorem – Timetable Management System *02/2024 – 06/2024*

- Developed backend system for automated timetable **conflict detection** and student notifications
- Served **4000+ students** with real-time course scheduling and timetable query capabilities
- Implemented **PostgreSQL** database optimization reducing **query response time by 60%**

missCord – Real-time Communication Platform *10/2023*

- Built distributed **video calling system** using **WebRTC** supporting **50+ concurrent users**
- Achieved **40% faster message loading** through **Redis caching** and optimized data structures
- Architected **containerized deployment** using **Docker, Socket.io**, and **microservices** pattern
